The government has made it mandatory for financial institutions, including banks, to verify and link [Aadhaar](#) of their customers with their accounts. According to a notification dated June 1, 2017, the deadline for doing this is December 31, 2017 (as of now), and accounts where this is not done are to be made inoperable after this date till the details are updated.

To comply with this directive, banks are now asking customers to submit their Aadhaar to link the same with their accounts. Next time you visit your bank branch for any transaction/ purpose which requires interaction with bank officials, they are likely to insist that you first update your Aadhaar in your records linked to your [bank account](#). It might also happen that the bank officials may even ask you to first provide your Aadhaar card or enrolment ID (if you have applied for Aadhaar but have not received it) before allowing you to conduct any kind of transaction.

However, even if you have submitted your Aadhaar details at your branch there is still a possibility that the linkage between the two was not done correctly by the bank or it may be that the bank has not linked Aadhaar with your account because they have misplaced your details.

Here's a step-by-step guide to check whether your Aadhaar has been linked with your bank account.

1. Visit the Aadhaar website - www.uidai.gov.in

2. Click on 'Check Aadhaar & Bank Account Linking Status' in Aadhaar Services.

Aadhaar Online Services

3. Enter your Aadhaar number and security code. Once submitted, an OTP will be sent to your mobile number registered in the Aadhaar database.

4. Enter the OTP and click on 'Login'

The image shows the 'Aadhaar Linking' form on the UIDAI website. At the top, there is a note: 'Note: Aadhaar Linking status is fetched from NPCI Server'. Below this, there is a disclaimer: 'Under any circumstance, UIDAI shall not be responsible or liable for the correctness of the displayed status. Further, UIDAI is not storing any information fetched from NPCI server.' The form is titled 'Check your Aadhaar and Bank Account Linking Status' and has 'Reset' and 'Cancel' buttons. The form contains three main input fields: 'Aadhaar Number *' (with a placeholder 'UID (1234/1234/1234)'), 'Enter Security Code *' (with a placeholder '1538' and a message 'Unable to View or Read? Try Another'), and 'Enter OTP *'. There is also a 'Send OTP' button.

5. On successful login, the website shows whether your Aadhaar number is successfully mapped or not.

Alternatively, you can also check this through your mobile.

1. Dial *99*99*1#
2. Enter your 12 digit Aadhaar number
3. Confirm that the digits entered by you is correct
4. On confirmation, it will show you the bank account linked with Aadhaar

Points to remember

1. It will only show you the last bank account that has been linked with your Aadhaar.
2. If you have multiple bank accounts, you will have to check the status of the same with the bank.
3. You will be able to use this service only if your mobile number is linked to your Aadhaar.
