NEW DELHI: The Unique Identification of Authority of India (UIDAI) has refuted a report in an international media outlet, which quotes a researcher saying that a state-owned utility company is claiming a vulnerability which can be used to access a huge amount of Aadhaar data.

'There is no truth in this story as there has been absolutely no breach of UIDAI's Aadhaar database. Aadhaar remains safe and secure. The story is..totally baseless, false and irresponsible,' the statement added.

UIDAI said it is also contemplating legal action against the media outlet for 'false and irresponsible' reporting.
