Aadhaar App crosses 3.1 crore downloads in 5 months of launch

The new mobile application of Aadhaar has crossed 31 million (3.1 crore) downloads within five months of its launch, an official statement said on Monday. Almost 4 million users have updated their mobile numbers through the new Aadhaar App, and around 8.5 lakh people have used it to update their address.

"The Aadhaar App is witnessing a robust acceptance among people across India, with over 31 million downloads since it was launched less than 5 months back. The growing adoption reflects increasing resident confidence in the App for bringing services at their fingertips," Aadhaar custodian, The Unique Identification Authority of India, said in a statement.

The new Aadhaar App enables various services, including updating mobile number and address directly on smartphones.

It also features sharing contact details digitally using an in-built QR, which does away with the need to carry visiting cards.

"The app has several pro-people features, including biometric lock/unlock in a single click, face verification for proof of presence, authentication history, and a QR-based editable contact card for easy sharing of contact information instead of physical visiting cards.

It also allows the download of e-Aadhaar and facilitates easy appointment booking online for visiting Aadhaar Seva Kendras (ASKs), among others," the statement said.

The new App also enables hotel check-ins through Offline Verification Seeking Entity's (OVSE) QR code scanning without the need for submitting a physical Aadhaar copy.

"It (new app) facilitates hospital admissions, visitor management, event entries, identity verification of gig workers and service partners among many such use cases," the statement said. (PTI)

Aadhaar App Crosses 31 Million Downloads: UIDAI

New Delhi, Jun 22 (KNN) The Aadhaar App has crossed 31 million downloads within five months of its launch, according to the Unique Identification Authority of India (UIDAI).

UIDAI in a press release said that nearly 4 million users have updated their mobile numbers through the app, while around 850,000 users have used it to update their addresses.

The app enables Aadhaar holders to access a range of services digitally, including mobile number and address updates, e-Aadhaar downloads, online appointment booking for Aadhaar Seva Kendras and Aadhaar authentication history.

Other features include biometric lock and unlock functionality, face authentication for identity verification and QR code-based sharing of identity information.

According to UIDAI, the mobile application can be used for identity verification in various settings, including hotel check-ins, hospital admissions, visitor management systems, event entry and verification of gig workers and service providers.

Aadhaar app crosses 3.1 crore downloads in 5 months; 40 lakh users update mobile numbers

New Delhi: India's new Aadhaar mobile application has crossed 3.1 crore (31 million) downloads within five months of its launch, highlighting the growing adoption of digital identity services across the country. The app enables people to avail themselves of various Aadhaar-related services from their smartphones, thus decreasing the necessity to go to the actual centres for normal replacement.

The Unique Identification Authority of India (UIDAI) said that almost 40 lakh people have changed their mobile numbers on the app, and about 8.5 lakh people changed their addresses. The surge in downloads indicates the growing trust in the platform and the adoption of a digital-first strategy for Aadhaar services, the authority said.
