

## **Aadhaar Drives Digital Transformation: 225 crore Aadhaar authentication transactions and 43 crore e-KYC transactions carried out in February, marking 14% yearly Growth**

### **Aadhaar face authentication sees record growth: 12.54 crore transactions in February, 115 crore Cumulatively**

Posted On: 07 MAR 2025 6:48PM by PIB Delhi

Aadhaar continues to drive **India's digital transformation**, with nearly **225 crore authentication transactions** and **43 crore e-KYC transactions** carried out in February 2025 alone. The increasing adoption of Aadhaar-based verification highlights its growing role in banking, finance, and other sectors, making processes more seamless, secure, and efficient.

The total number of eKYC transactions (42.89 cr) carried out during February 2025 is almost 14% more than the numbers during the same period last year.

Aadhaar e-KYC service continues to play an important role for banking and non-banking financial services by providing transparent and improved customer experience, and helping in ease of doing business.

#### **By the end of February 2025**

- The total number of Aadhaar authentication transactions has crossed 14,555 crore.
- The total e-KYC transactions have gone beyond 2,311 crore.

#### **Face authentication using Aadhaar gaining popularity**

Aadhaar face authentication transactions continue to get good traction. In February 12.54 crore Aadhaar face authentication transactions were carried out. This is a monthly all time high, since this authentication modality was first introduced in October 2021.

At least 97 entities have so far on-boarded to use face authentication. Kotak Mahindra Prime Ltd, PhonePe, Karur Vysya Bank and J&K Bank were the new entrants who have on-boarded to use face authentication.

Cumulatively, Face Authentication transaction numbers have crossed 115 crore, since it was first rolled out. Of the total numbers, nearly 87 crore such transactions were carried out this financial year, alone.

The AI/ML based face authentication solution, developed in house by the UIDAI, is being used across sectors including finance, insurance, fintech, health and telecommunications. Several Government departments both at the centre and states are using it for smooth delivery of benefits to targeted beneficiaries.
