New Aadhaar app with facial authentication in testing phase: Vaishnav

New Aadhaar app with facial authentication in testing phase: Vaishnav

The Hindu Bureau
NEW DELHI

A new Aadhaar app will be put out by the Unique Identification Authority of India soon, Minister of Electronics and Information Technology Ashwini Vaishnav said at an event in Delhi on Tuesday. The app has a revamped design. It also has a facial recognition feature to securely share Aadhaar data with hotels and other "requesting" entities without the need to share a hard copy.

It will allow users to avoid sharing a physical Aadhaar card or photocopy at hotels, airports and other places where the document is used as an ID

proof. It will allow one to use their phone to scan a QR code and their face to verify their identity. The app is currently available to a closed group and will be rolled out widely after testing.

The facial recognition tool for verifying Aadhaar holders' identity for use cases like verification during a know-your-customer (KYC) process has existed for a few months, available through an app called AadhaarFaceID. This app is currently only triggered through a KYC request by scanning a QR code, after which the user is prompted to show their face to their smartphone camera and blink, after which their details are verified.

NEW DELHI: The Unique Identification Authority of India (UIDAI) has developed a new mobile application that will allow Aadhaar holders to share only necessary personal information while availing services, eliminating the need for physical photocopies of the identification document.

Union minister for electronics and information technology Ashwini Vaishnav announced

the beta testing phase of the application on social media, describing it as a tool that gives users "complete control over their personal information" with just a tap.

The application is currently in the beta testing phase. The government did not share a timeframe for its release. "Aadhaar verification becomes as simple as making UPI payment. Users can now digitally verify and share their Aadhaar details while ensuring their privacy," Vaishnav said.

For instance, a person aware of the matter explained that if someone asks for Aadhaar while entering a historical monument, the visitor needn't share all the fields given in an Aadhaar. Through the app, they could potentially only share their name. UIDAI already runs the mAadhaar app that can be used for different Aadhaar related services such as updating address details, scanning QR codes on Aadhaar cards. The idea with the new app is to upgrade this existing system.

Govt unveils new Aadhaar app with face ID authentication

Govt unveils new Aadhaar app with face ID authentication

NEW DELHI, PTI: Union IT Minister Ashwini Vaishnav on Tuesday showcased a new Aadhaar app that features QR code-based instant verification and real-time face ID for authentication, eliminating the need for people to carry physical photocopies or cards with them.

Aadhaar verification becomes as simple as making UPI payment, Vaishnav said in a post on X.

Once out of beta testing phase and widely implemented across the country, this would mean that individuals, when asked for ID - say, at a hotel, airport, or by a train ticket checker - no longer have to hand over a

the case today. Instead of showing physical photocopies of their Aadhaar, the new app would enable individuals to verify their identity after the QR code scan.

Just as UPI payment QR codes are widely available, at almost every point of payment in India, Aadhaar verification QR codes too would soon be available at 'points of authentication'.

People can just scan the QR code using the new Aadhaar app, and their face gets verified instantly. The ID is securely shared, directly from an individual's phone, not from a photocopy. Vaishnav showcased the power of the app in a video

THE TIMES OF INDIA

New Aadhaar app with face ID soon

New Delhi: IT & electronics minister Ashwini Vaishnav on Tuesday gave details about an upcoming new Aadhaar app that would provide face ID authentication and eliminate the need for physical cards and photocopies. "With just a tap, users can share only the necessary data, giving them complete control over their personal information," he said on X, adding that the new app is in the beta testing phase.

The minister said that with the upgraded app, Aadhaar verification will become as simple as making a UPI payment. "Users can now digitally verify and share their Aadhaar details while ensuring their privacy. Simply scan a QR code or use a requesting application."

He said that with the new Aadhaar app, users will no longer need to get their Aadhaar scanned or photocopied. "No need to hand over Aadhaar photocopy at hotel receptions, shops, or during travel. The Aadhaar app is secure and shareable only with the user's consent." The new app ensures stronger privacy and will prevent misuse or leaks of Aadhaar data. **TNN**

Aadhaar Samvaad Delhi Media coverage (2)

AI Is New Industrial Revolution: Minister Ashwini Vaishnaw At UIDAI's 'Aadhaar Samvaad'; New Aadhaar App Launched

Electronics and IT Minister Ashwini Vaishnaw today underlined that AI is the new industrial revolution and urged stakeholders to share ideas on integrating AI with digital public infrastructure. Inaugurating a day-long stakeholders' meet organized by the Unique Identification Authority of India (UIDAI) with ecosystem partners in Delhi, Mr Vaishnaw said Aadhaar is the 'aadhaar' of many initiatives and is the core of DPAs. He stated that the central government has a primary focus on improving the ease of living further.

He gave the example of Aadhaar face authentication in this context and how it is an enabler. Nearly 750 senior policymakers, experts, technocrats, sectoral leaders, and professionals came together for the 'Aadhaar Samvaad'. UIDAI CEO Bhunesh Kumar said Aadhaar face authentication is becoming the hallmark of the authentication landscape.

UIDAI also unveiled a new Aadhaar app for secure digital verification and QR-based data sharing, which enhances user privacy and reduces dependence on physical copies.

आ गया नया Aadhaar App, मंत्री अश्विनी वैष्णव ने शेरिया किया वीडियो, ऐसे करेगा काम

केंद्रीय आईटी मंत्री अश्विनी वैष्णव ने मंगलवार को आयोजित इवेंट में कहा कि ऐप अपने के बाद होल्ट या अन्य किसी जगह आधार कार्ड की फोटोकॉपी देने की जरूरत नहीं होगी. उन्होंने आगे बताया कि UIDAI का एक नया ऐप आया है, जो अभी बीटा वर्जन में है, इस ऐप में फेस ऑथेंटिकेशन की मदद से पूरी प्रक्रिया होगी.

भारतीय विशिष्ट पहचान प्राधिकरण (UIDAI) द्वारा तैयार किया गया आधार कार्ड आउटलुक हर एक भारतीय के लिए जरूरी बन चुका है. एक्टिवेट, होल्ट या अन्य किसी जगह सिक्योरिटी कानून हो, लागू सभी जगह आधार कार्ड की कॉपी का ऑथेंटिकेशन कार्ड या फोटोकॉपी दिखानी होती है. अब ऐसा नहीं होगा, इसके लिए केंद्रीय मंत्री अश्विनी वैष्णव ने मंगलवार को नई दिल्ली में आयोजित एक कार्यक्रम के दौरान नया आधार मोबाइल ऐप लॉन्च किया है.

New Aadhaar app, powered by FaceID and AI, enters beta testing

New Aadhaar App With Face ID: On Tuesday, Union Minister Ashwini Vaishnaw introduced the new Aadhaar app, powered by Face ID and AI, in an X post. According to the post, the new Aadhaar app, currently in beta testing, eliminates the need to carry a physical Aadhaar card or its photocopy and allows authentication without handing over a copy of the Aadhaar.

New Aadhaar app with facial authentication launched in testing phase; will make verification as simple as making UPI payment

A new Aadhaar app will be launched by the Unique Identification Authority of India (UIDAI) soon, Minister of Electronics and Information Technology Ashwini Vaishnaw said at the Aadhaar Samvaad event in Delhi on Tuesday.

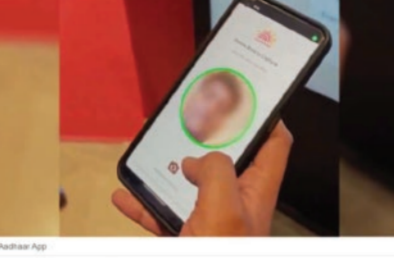

"Aadhaar verification becomes as simple as making UPI payment. Users can now digitally verify and share their Aadhaar details while ensuring their privacy. Simply scan a QR code or use a requesting application," said Vaishnaw.

The new app has a revamped design, compared to the existing mAadhaar app. It also has a facial recognition feature to securely share Aadhaar data with hotels and other "requesting" entities without the need to share a hard copy.

Upcoming Aadhaar app to replace need for physical card and photocopies

Government of India is working on a smartphone app for Aadhaar that it said would use facial recognition technology and QR codes to let users authenticate their identity

The Union Minister of Electronics and Information Technology, Ashwini Vaishnaw, has announced that a new Aadhaar app will soon be launched by the Unique Identification Authority of India (UIDAI), aimed at eliminating the need for users to carry physical or photocopied versions of their Aadhaar card.

The app will use facial recognition technology and QR codes to allow users to authenticate their identity. According to a Hindustan Times report, the app will feature a redesigned interface compared to the existing mAadhaar app. Currently in its beta testing phase, the app is expected to be rolled out nationwide soon.

New Aadhaar app launched in beta version: How face ID enables verification like UPI

The app, built with support from UIDAI, uses Face ID and artificial intelligence for real-time authentication. It also features QR code-based instant verification.

Aadhaar verification can now be done by simply scanning a QR code, much like making a UPI payment.

Union minister Ashwini Vaishnaw launched the much-anticipated Aadhaar app on Tuesday to make it more accessible and secure. The new app combines face ID authentication and artificial intelligence (AI) to bring the digital Aadhaar service to Indian citizens through a mobile application.

नया Aadhaar app लॉन्च, अब नहीं देनी होगी फोटो कॉपी, UPI की तरह QR Code स्कैन करने से ही हो जाएगा काम - NEW AADHAAR APP

केंद्र सरकार ने एक नया आधार ऐप लॉन्च किया है. इससे यूजर्स को अपनी आधार से जुड़ी जानकारी का वैधता चेक करने के लिए आधार कार्ड रखने की जरूरत नहीं होगी.

By ETV Bharat Hindi Team Published: April 8, 2025 at 11:52 PM IST

नई दिल्ली: केंद्र सरकार ने एक नया आधार ऐप लॉन्च किया. इससे जल्द यूजर्स को अपनी आधार से जुड़ी जानकारी का वैधता चेक करने के लिए किसी विशिष्ट कार्ड या फोटो कॉपी को रखने की जरूरत नहीं होगी.

यह जानकारी केंद्रीय सूचना प्रौद्योगिकी मंत्री अश्विनी वैष्णव ने है. इस संबंध में केंद्रीय मंत्री ने सोशल मीडिया प्लेटफॉर्म एक्स पर एक वीडियो भी जारी किया है.

New Delhi: In a major step towards digital convenience and privacy, the Centre on Tuesday launched a new Aadhaar app that allows users to verify and share their Aadhaar details digitally -- eliminating the need to carry physical cards or submit photocopies.

The app was officially launched by Union Minister for Electronics and IT, Ashwini Vaishnaw, in the national capital.

Highlighting the importance of digital innovation, the minister described the app as a move to make Aadhaar verification easier, faster, and more secure.

Govt Launches New Aadhaar App: No Need To Carry Photocopies Anymore

By Shambha Datta Mishra National, Science & Tech | Tue, Apr 8 | 9:39 pm

The app was officially launched by Union Minister for Electronics and IT, Ashwini Vaishnaw, in the national capital.

No Need to Carry Your Aadhaar Card. Govt Launches New Aadhaar App. What it is and How Will it Work?

One of the most innovative and exciting features of the new Aadhaar app is its integration with QR codes.

Govt Launches New Aadhaar App: Now you do not have to carry your Aadhaar card or submit photocopies of your Aadhaar card as proof. It is a significant move aimed at enhancing convenience, and ensuring user privacy, the Government of India on Tuesday, launched a new Aadhaar app that enables users to verify and share their Aadhaar details digitally. This new digital solution eliminates the need to carry physical Aadhaar cards or submit photocopies at hotels, shops, airports, and various other locations.

Govt Launches New Aadhaar App

Union Minister for Information and Technology, Ashwini Vaishnaw, introduced the new Aadhaar app. It is a video shared on his X, he showcased the app's key features, such as Face ID authentication and the ability to share Aadhaar data securely with user consent.

New Aadhaar App: लॉन्च हुआ नया आधार ऐप, अब नहीं पड़ेगी कार्ड की जरूरत, जानें क्या होगा फायदा

अब पहचान की पुष्टि के लिए हर बार आधार की फोटोकॉपी देना जरूरी नहीं होगा। होटल में चेक-इन, फ्लाइट में बॉर्डिंग, बैंक में खाता खुलवाना या किसी दफ्तर में वैरिफिकेशन—हर जगह आप इस ऐप के जरिए आसानी से पहचान साबित कर सकेंगे।

केंद्रीय आईटी मंत्री अश्विनी वैष्णव ने मंगलवार को इस नए ऐप की जानकारी दी है। उन्होंने X (पूर्व में Twitter) पर इसका एक टेमो वीडियो शेयर किया, जिसमें बताया गया कि यह ऐप कैसे काम करेगा। यह ऐप UPI की तरह बैंक ट्रांसैक्शन और पूंज-क्रेडिटली होगा।

इसमें पूंज को बस एक QR कोड स्कैन करना होगा और फिर ऐप सेल्फी कैमरे से उनका चेहरा स्कैन करके पहचान की पुष्टि करेगा। न कोई कार्ड दिखाना, न कोई फोटोकॉपी देना—बस स्कैन करो और काम हो गया।

Ashwini Vaishnaw launches new Aadhaar app with Face ID and QR code features with focus on privacy

The mobile application, supported by UIDAI, leverages artificial intelligence alongside Face ID for real-time authentication

Union minister Ashwini Vaishnaw Tuesday launched the beta version of a new Aadhaar mobile application.

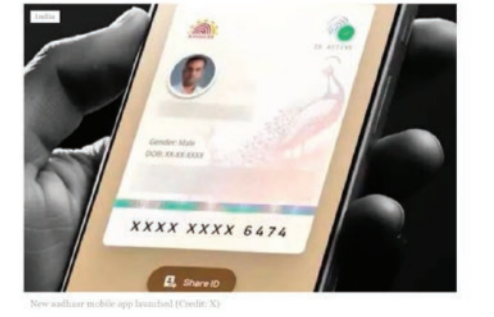

The app is designed to allow Aadhaar holders to share only the necessary personal information while availing services, thereby eliminating the need to carry physical photocopies of the identification document.
