

UIDAI joins hand with Google for displaying authorised Aadhaar Centres on Google Maps

Soon People across the country will be able to locate nearest verified Aadhaar Centres and check available services

Posted On: 26 FEB 2026 2:48PM by PIB Delhi

The Unique Identification Authority of India (UIDAI) and Google have joined hands to enable the display of authorised Aadhaar centres on Google Maps, a move that will enhance ease of access and convenience for residents across the country.

The initiative will help residents identify Aadhaar Centres based on the nature of services offered, like adult enrolment, child enrolment or only address and mobile update. In addition, information related to centre accessibility, including features such as divyang-friendly infrastructure and availability of parking facilities, operating hours, will also be displayed wherever applicable, further enhancing convenience for residents.

The facility is expected to be available in the coming months.

The collaboration is designed to enhance public convenience, combat misinformation, and ensure residents have seamless access to over 60,000 Aadhaar centres including state-of-the-art Aadhaar Seva Kendras (ASKs), nationwide. This will ensure that when users search on Google Maps they are directed to verified Aadhaar centres.

"UIDAI is always focused on improving ease of living for Aadhaar number holders. This collaboration will ensure that navigating the authorised Aadhaar centres is now simpler, faster, and more transparent," said Sh. Bhuvnesh Kumar, CEO, UIDAI.

In the subsequent phase of the collaboration, UIDAI will use Google Business Profile to manage centre information and respond directly to people's feedback, ensuring a transparent and responsive service ecosystem.

Looking ahead, the partnership will explore direct appointment booking through the Google Maps interface allowing residents to plan their visits with even greater efficiency.

“By joining hands with UIDAI to integrate verified Aadhaar centres, we are making it easier for millions of residents to find trusted services with confidence and bridging the gap between essential government infrastructure and the people who need it most,” said Ms. Roli Agarwal, Country Head, Strategic Partnerships at Google India.
