

2,300 bank branches have Aadhaar centres

New Delhi: Only about 2,300 branches of private and public sector banks have opened Aadhaar enrolment and updation centres within their premises as against the targeted 15,300 branches by this month end, an official source said Friday. The Aadhaar-issuing body has already extended by a month, till October 31, the deadline for banks to open Aadhaar enrolment and updation centres in at least 10 per cent or over 15,000 of their branches. This is the second extension given to the banks for opening such centres.
