

■ Aadhaar Act has Strong Privacy Provisions: Kant

NEW DELHI: Niti Aayog CEO Am-
itabh Kant on Thursday said the
Aadhaar Act has strong privacy
provisions while dismissing fears
that there is possibility of misuse of data. "The
Aadhaar Act has strong privacy provisions. I
am a great believer in privacy of data," the Niti
Aayog CEO said while replying to a query at an
event. Kant, however, cautioned that India
definitely needs to take care of privacy in
future. "I think India in future needs to move
towards a strong Privacy Act," he said. His
statement comes in the wake of sharing of
personal details of cricketer MS Dhoni on social
media by an agency that helps the Unique
Identification Authority of India enroll citizens
for Aadhaar.
