

‘Aadhaar system is secure’

SPECIAL CORRESPONDENT

NEW DELHI

Electronics and IT Minister Ravi Shankar Prasad Friday said that the Aadhaar system of biometric identification is secure and is backed by a law that is tough on the misuse of data.

“You need to understand that if a banker is seeking authentication, Aadhaar system does not know for what purpose the bank is seeking authentication... is it for opening bank account or something else? We only authenticate that the person is who he says he is,” he said.
