Corrigendum to Invitation for Expression of Interest for Participation in Biometric Authentication Proof of Concept Studies

A reference is invited to Device Specifications given in Annexure I of the 'Invitation for Expression of Interest for Participation in Biometric Authentication Proof of Concept Studies' dated 4 April 2011.

The device specifications given in Annexure I have been modified to include the following additional/revised requirements.

1. "Against the device specifications pertaining to operating system environment in Annexure 1 which reads as " Windows 2000, XP, Linux, Vista" the following is replaced **" Windows 2000/Windows XP/Windows Vista, Linux, Android"**

2. **The following additional specifications are added:**

Support for Java	Extractor/SDK support for Java platform is Mandatory.
JNI/JAVA Library	Vendor has to provide JNI/JAVA Library with specific function calls for Device Initiation/Disconnection, Finger Image Capture etc for integrating device with UIDAI authentication application.
SDK Documentation	SDK should have clear documentation especially highlighting the function calls for Device initiation/Disconnection, Finger Capture, ISO template extraction (ISO19794-4)and ISO image extraction(ISO19794-2). Documentation Should include attributes of Fingerprint Raw Image such as Height / Width, Bits Per Pixel etc.
Sample Code	Sample code should accompany SDK to illustrate methods of using the sensor and SDK.

3. **Different timelines are also extended. Following are the new timelines:**

S. No	Milestone	Timeline
1.	Last date for providing concurrence for participating in the PoC by device vendors	28th April 2011
2.	Last date for bringing devices and technical manpower to UIDAI Delhi office for application integration	2nd May 2011
3.	Deploy devices for PoC Studies	9th May 2011 onwards
