## PART-II: INTRODUCTION:

1. The UIDAI proposes to invite proposals from competent and eligible entities to engage the services of two Implementation Partners (IAs) to undertake the work relating to processing applications of residents to update their Aadhaar related demographic data recorded with it. The residents will have a choice to select either the agency to carry out their requests following the procedure and protocols laid down by the UIDAI.
2. The Unique Identification Authority of India (UIDAI) is mandated to issue unique numbers (Aadhaar numbers) to every resident in the country. The UIDAI has begun issuing Aadhaar numbers in partnership with a large number of Registrars across the country. The process of enrolments has been gaining momentum since the launch of project on 29th September, 2010 and more than 50 crore Aadhaar have been issued.
3. Aadhaar number is a 12-digit **nationally valid unique life time identifier** for Indian residents and many services are expected to ride on Aadhaar in future. Aadhaar platform is expected to become the country's central identity management system. The initiative to issue an Aadhaar number to every resident in India has, at its heart, an ambitious objective: to make identity easily authenticable and verifiable for residents across the country and to make service delivery more effective and efficient. The Aadhaar number is expected to become a convenient, real-time means for individuals to verify their identity anywhere in India. Any agency wishing to authenticate the identity of any resident would be able to contact the UIDAI's Aadhaar database, the Central Identification Data Repository (CIDR), to verify that the 'residents are who they claim they are'. Aadhaar is expected to help the resident not only prove their identity but will also be useful in delivery of public services by various agencies. Aadhaar has the potential to be utilized in a variety of social sector schemes in *Government and non-Government Services, Subsidy Benefits, Pensions, Scholarships, Social Benefits, Banking services, Insurance services, Taxation services, Education, Employment, Healthcare etc.* not only for improving delivery of service to the intended beneficiary but also to make the administration of the scheme more transparent and efficient.
4. Enabling Aadhaar for various services makes it essential to ensure that the resident information stored in the CIDR is accurate, relevant and up-to-date. Corresponding to changes in a resident's life events, movement to newer locations etc., demographic data such as resident's name, address, mobile number etc. are expected to change through the course of time. The biometric information may also require update with life progression, such as children completing 5/15 years of age, changes in appearance due to age progression, wearing-out of fingerprints, etc. It will also be necessary to update deaths reported in the central database at CIDR.
5. In view of the above, UIDAI has proposed to provide a facility to residents to update their data in CIDR from time to time and ensure that CIDR is up-to-date & accurate at all times. All Update modes can broadly be categorized into two categories:
  - **Assisted Modes**– These are modes where residents place the Update request with the help of an operator at an enrollment/update center. In such a case, the documentary evidence is collected by the operator at the time of accepting the request.
  - **Self-Service Modes** – These are modes where a resident places the Update request directly without any Assistance. The resident may send/upload documentary evidence which may be verified against requested data at a later stage at UIDAI's Update back-office by a Verifier. UIDAI has currently envisaged four modes for Self Service Update, i.e. Online Portal, Registered Mobile and Physical Mail.

6. It is proposed that the backend work for the Self-service update process through the online portal and physical mail may be done through a partner organization, which has more professional expertise and would also have flexibility in adding /reducing the personnel as per the need of the time.

The committee may be comprised of, or receive assistance from, several teams conducting parallel evaluations.

Evaluation of the bids will be done in three stages and at the end of every stage short listed bidders will be informed of the result. Evaluations will be based on the proposals, and any additional information requested by the tendering authority. The following is the procedure for evaluation.

### **Evaluation of pre-qualification bids**

- a. The documentation furnished by the bidder will be examined prima facie to see if the technical skill base and financial capacity and other bidder attributes claimed therein are consistent with the requirements of this project and meet the pre-qualification criteria as specified above in Table 1, Part III of Section II of this RFP.
- b. The evaluation committee may ask bidder(s) for additional information, visit to bidders site and/or arrange discussions with their professional, technical faculties to verify the claims made in bid documentation.
- c. Any proposal not complying with the requirements of the pre-qualification criteria will not be processed further.

### **Evaluation of Technical bids**

The technical proposals of only those bidders, who qualify in the evaluation of the pre-qualification proposals, shall be opened. The evaluation of the Technical bids is carried out in the following manner:

- a. The bidders' technical solutions proposed in the bid document will be evaluated as per the requirements specified in the RFP and adopting the evaluation criteria spelt out in Table 2, Part III of Section II of this RFP.
- b. **Proposal Presentations** The committee may invite each bidder to make a presentation to the tendering authority at a date, time and location determined by the tendering authority. The purpose of such presentations would be to allow the bidders to present their proposed solutions to the committee and the key points in their proposals.
- c. The committee may seek oral clarifications from the bidders. The primary function of clarifications in the evaluation process is to clarify ambiguities and uncertainties arising out of the evaluation of the bid documents. Oral clarifications provide the opportunity for the committee to state its requirements clearly and for the bidder to more clearly state its proposal. The committee may seek inputs from their professional, technical faculties in the evaluation process.

- d. Depending on the evaluation methodology mentioned in points a, b and c, each Technical Bid will be assigned a technical score out of a maximum of 100 points.
- e. The bidders, who score a Technical score of more than 70 marks, will qualify for the evaluation in the commercial process.

### **Evaluation of Commercial bids**

- a. The Commercial Bids of the technically qualified bidders only will be opened.
- b. It is envisaged to engage 2 (two) 'IA' for the work.
- c. In case, any of the service provider (L1 or matching L2) is not able to meet the requirements as per RFP, UIDAI reserves the right to re-allocate the volume of work between these two selected service providers, as per their capability and capacity, for a limited period or on permanent basis
- d. The bids shall be evaluated on all inclusive rate( including all applicable taxes and duties)
- e. The bidder having the lowest bid for the processing of request shall be declared as lowest bid.
- f. The lowest rate L1, received from a qualified bidder will be treated as the **"Discovered Rate"**.
- g. Once the L1 bidder is identified, the bidder at L2 will be given first rights to match the L1 rate in order to receive an order for carrying out the services.

## SECTION-III

### SCOPE OF WORK, DELIVERABLES AND SLAs

. As explained in Part II of Section I, all Update modes can broadly be categorized into two categories:

- Assisted Modes
- Self-Service Modes

Since the launch of any of the above modes require a certain amount of preparation on the part of UIDAI, the modes are being launched in phases. Currently, the following modes of update are available to the resident

- a. Client(UCS- Update Client Standard)
- b. Self-service update portal (SSUP)
- c. Physical mail.

The SSUP and the Physical mail service were started in October, 2012 in a pilot mode and was made available to the general public on 29th November, 2013.

Since the launch of the online portal and post modes of update, the number of update requests through these modes has been continuously increasing. The current trend of receiving requests through these modes is shown in the below table:

Jan,2013	59049
Feb	83354
March	116471
April	125470
July	120328
August	147890
September	207137
October	149660
November	169953
December	229178

Currently these requests are handled in the following regional offices catering to various languages.

Regional Office	Language
Lucknow	Hindi
Hyderabad	Oriya, Telugu
Mumbai	Gujarati, Marathi, English
Chandigarh	Punjabi
Bengaluru	Kannada, Malayalam, Tamil
Ranchi	Bengali

In future, UIDAI may allow enrollment/update in other languages.

Since Update of resident information in Aadhaar database is an evolving process, there is no minimum volume that can be guaranteed to the partner organization, for the number of requests for processing in the coming year/s. However, UIDAI envisages number of scenarios due to which the residents may have the need to update any of the data fields captured by UIDAI during resident enrolment, or during a prior update. For example:

- Changes in life events such as marriage may lead to residents changing their basic demographic details such as name and address.
- Address and mobile number could also change due to migration to newer locations.
- Residents may also want changes in their relative's details due to changes in life events such as marriage, death of a relative etc. In addition, residents could have other personal reasons to change their mobile number, email address etc.
- Changes in various service delivery platforms may lead residents to request changes to and to add mobile number to Aadhaar etc.

The number of Aadhaar is being generated at the rate of almost 1.2 million a day. The number of requests for Update is expected to increase as the number of residents enrolled in Aadhaar database increases. More and more services will start using Aadhaar platform in the future and, therefore, the resident's need to update their information in Aadhaar database will also rise.

The selected Implementation partner is expected to cater to handle the requests for all languages. The service volume is expected to fluctuate depending upon different factors like; increase in issuance of Aadhaar enrolments, integration of service launched with Aadhaar, etc.

Description of Services mentioned in this section, gives an insight of UIDAI's expectation towards BPO for Aadhaar Update

The residents can update most of the information through the Update client including the bio-metric. The updates requested by the residents through the client are outside the purview of the scope of work for the IA to be selected through this RFP.

#### **2. Self-service update portal (SSUP):**

The following data either by submitting your request Online or sending request through Mail:

- Name
- Gender
- Date of Birth
- Address
- Mobile Number

UIDAI may further add/delete fields that can be updated using online and post mode.

The online requests require the resident to receive an OTP on the registered mobile number (provided at the time of enrollment) or alternate mobile number (if no number was provided at the time of enrolment)

#### **3. Physical mail**

While the online option is available to the resident, keeping in mind some of the difficulties faced by the residents, UIDAI has also provided the option to the resident to request for update of data through a physical application sent through mail to the respective Regional offices based on the language. After the Implementation Partner is on board, all Postal requests will be sent to one single address irrespective of the language. UIDAI will open a PO box location in the location specified by the IA. The collection of the request from this box shall be the responsibility of the IA.

The detailed steps involved in the SSUP request and physical mail request is detailed in Annexure V

- The IA will deploy an IT system which shall maintain a call log for the calls made to residents as per the process.

#### Update of Mobile number for resident

In certain cases, where the resident has not given a mobile number at the time of enrollment or the number is not in use, UIDAI has provided an additional facility.

## PART-II - Service Level Agreement

Service Level Agreement (hereinafter referred to as SLA) is to clearly define the levels of service which shall be provided by the Service Provider to UIDAI for the duration of this contract.

<b>Benefits of this SLA</b>	<p>Trigger a process that draws the UIDAI and the Service Provider management attention to some aspect of performance when that aspect drops below an agreed upon threshold, or target.</p> <p>Makes explicit the expectations that UIDAI has for performance.</p> <p>Helps UIDAI control the levels and performance of Service Provider services.</p> <p>UIDAI and Service Provider shall maintain a weekly/monthly contact to monitor the performance of the services being provided by the Service Provider and the effectiveness of this SLA.</p>
<b>SLAs &amp; Targets</b>	<p>This SLA document provides for minimum level of services required as per contractual obligations based on performance indicators and measurements thereof. The Service Provider shall ensure provisioning of all required services while monitoring the performance of the same to effectively comply with the performance levels.</p> <p>The services provided by the Service Provider shall be reviewed by the UIDAI and UIDAI shall:</p> <ol style="list-style-type: none"> <li>a. Check performance of the Service Provider against these SLAs over the review period and consider any key issues of the past period's performance statistics including major incidents, service trends, etc.</li> <li>b. Discuss escalated problems, new issues and matters still outstanding for resolution.</li> <li>c. Review of statistics related to rectification of outstanding faults and agreed changes.</li> <li>d. Provide suggestions for changes to improve the service levels.</li> </ol> <p>In case desired, UIDAI may initiate an interim review to check the performance and the obligations of the Service Provider.</p> <p>The SLA may be reviewed and revised in accordance to the procedures detailed under <b>SLA Change Control</b>. SLA Change Control procedures will be used if there is a dispute between UIDAI and the Service Provider on what the performance targets should be set.</p>

This document also defines the following management procedures:</p> <p>A process for negotiating changes to the SLA.</p> <p>An issue management process for documenting and resolving difficult issues.</p> <p>UIDAI and Service Provider management escalation process to be used</p>

	<p>in the event that an issue is not being resolved in a timely manner by the lowest possible level of management.</p> <p>If there is any confusion or conflict between this document and the Contract, the Tender and its addenda, the Contract will prevail.</p>
<b>SLA Change Process</b>	<p>The parties may amend this SLA by mutual agreement in accordance with terms of this contract. Changes can be proposed by either party. The Service Provider can initiate an SLA review with the UIDAI. Normally, the forum for negotiating SLA changes will be UIDAI's monthly meetings. Unresolved issues will be addressed using the issue management process.</p> <p>The Service Provider shall maintain and distribute current copies of the SLA document as directed by UIDAI. Additional copies of the current SLA will be made available at all times to authorized parties.</p>
<b>Issue management procedures</b>	<p>This process provides an appropriate management structure for the orderly consideration and resolution of business and operational issues in the event that quick consensus is not reached between Purchaser and Service Provider. It is expected that this pre-defined process will only be used on an exception basis if issues are not resolved at lower management levels.</p> <ol style="list-style-type: none"> <li>Either UIDAI or Service Provider may raise an issue by documenting the business or technical problem, which presents a reasonably objective summary of both points of view and identifies specific points of disagreement with possible solutions.</li> <li>Purchaser and the Service Providers representative will determine which committee or executive level should logically be involved in resolution.</li> <li>A meeting or conference call will be conducted to resolve the issue in a timely manner. The documented issues will be distributed to the participants at least 24 hours prior to the discussion, if the issue is not an emergency requiring immediate attention.</li> <li>Management of Purchaser and Service Provider will develop a temporary, if needed, and the permanent solution for the problem at hand. The Service Provider will then communicate the resolution to all interested parties.</li> </ol> <p>In the event a significant business issue is still unresolved, the arbitration procedure described in the Contract will be used.</p>
<b>Service Level Agreement Applicability</b>	<p>The parameters noted below in the Service Level Agreement will start to be applicable after the completion of 90 days from the start of commencement of work or after the reach of steady state, whichever is earlier.</p> <p>UIDAI reserves the right to re-visit SLAs at a later date based on learning from past experience and stabilization of operations.</p>
<b>Service Level Agreement (SLA) Parameters</b>	<p>The SLA parameters are provided in the table below</p>

Following Table details the expected service performance levels from the IA.
