PART-II: INTRODUCTION:

1. The Unique Identification Authority of India (UIDAI) has been established by the Government of India in January 2009, as an attached office to the Planning Commission. The mandate of the Authority is to issue a unique identification number (called Aadhaar or UID) to all Indian residents that is: (a) robust enough to eliminate duplicate and fake identities, and (b) can be verified and authenticated in an easy, cost-effective manner.
2. The timing of this ambitious initiative coincides with the increased focus of the GoI on social inclusion and development through massive investments in various social sector programs, and transformation in public services delivery through e-Governance programs. The UID has been envisioned as a means for residents to easily and effectively establish their identity, to any agency, anywhere in the country, without having to repeatedly produce identity documentation to agencies. More details on the UIDAI and the strategy overview can be found on the website: <http://www.uidai.gov.in>
3. In this context, the UIDAI is collecting the demographic and Biometric data of residents of India. After de-duplication, it issues a Unique Identification Number to the resident, which is a 12 digit random number. It is intended to give UID number to each of the Resident across the country. As of now, UID number is being delivered to the resident in the form of a laminated letter through post. Now the GoI has decided to deliver the UID/Aadhaar number in the form of a Aadhaar Card. This Request for Proposal document is intended to invite bids from reputed and reliable firms for undertaking the work of Printing of the Aadhaar Card and delivering that card to the designated Post Offices across India. The data for the preparation of Card will be provided by the UIDAI in electronic form.
4. It is envisaged that 'Three Firms/Consortiums' are selected for carrying out this work.

SECTION-III

SCOPE OF WORK

PART-I: DESCRIPTION OF SERVICES

1. GENERAL

The UIDAI estimates to print 15 crore Cards at approximately 10 lakh Cards per day. This work is expected to be distributed across three printing houses/firms as per the volume allocations indicated in Clause 2.3 of Part-IV of Section-II of this RFP. Each supplier is expected to have the ability to ramp up to 25% more than the allocated capacity within 6 weeks of intimation of the same.

2. RECEIVING OF DATA FROM UIDAI

The Supplier shall provide a dedicated leased line between the print facility/facilities and the Data Centers of UIDAI. Currently, the UIDAI has a Data Center in Bangalore with a second Data Center coming up in NCR.

The Data Transfer shall be on SFTP. The bandwidth of the leased line should be capable of transferring electronic data in 6 to 8 hours. The estimated size of each file is 75 KB.

3. SORTING OF DATA

The Supplier is expected to have in place sophisticated 'sorting software' capable of sorting the electronic data to ensure high efficiencies at the delivery end. This would require minimum Branch Office-wise (Department of Posts) sorting of the data provided.

4. SECURITY OF DATA

Ensuring Data Security of electronic data provided by the UIDAI is of paramount importance. In addition to the standard guidelines of the Govt. of

India on Data Security, the Security Guidelines issued by UIDAI on the subject need to be followed. Any other instructions on Data Security issued by the UIDAI from time to time have to be followed strictly.

5. PRINTING OF AADHAAR CARD

The letter and the attached Card need to be printed to the quality and specifications mentioned in Appendix-A.

6. PRINTING OF LETTER AND ENVELOPING

Whereas, letter printing and card printing may take place on separate machines, demonstrated proof of zero error matching is a pre qualification criteria for any supplier desirous of obtaining this contract.

Given the volumes on a daily basis, the entire printing process up to enveloping level needs to be duly automated with due checks and balances at each stage, to ensure ‘tracking’ of individual articles. Capability to track every single article at every stage must reflect on a Real Time MIS based monitoring system. The supplier shall provide the Web access of this facility to UIDAI.

7. SORTING, STUFFING, BAGGING AND DESPATCH OF CARDS

The grouping of letters would need to be done Pin-Code wise and branch office wise.

Letters created for particular Branch Office of the Department of Posts need to include a Manifest (list), in three copies, which records the unique tracking barcode allocated by the Department of Posts, both as a barcode and as a list to enable recording of delivery of this information. An indicative Manifest is placed at Appendix-B. Final format will need to be finalized in consultation with the UIDAI and the Department of Posts. This process of finalization of manifest shall be facilitated by the UIDAI.

8. PROOF OF DISPATCH & LOCAL SPEED POST BOOKING

The Department of Posts is the logistics partner for letter delivery. The proof of dispatch of letters will be uploading of dispatch information on the Speednet server of the department of posts.

The Upload on Speednet is to be enabled from ONE designated location in every State. This location will normally be the State Capital, but the UIDAI may, with adequate notice, change the said location during the course of Contract.

In the case of North East, the upload point could be the State Capital or Guwahati.

The supplier is expected to provide an online MIS for tracking letter delivery, Real Time, from the time of electronic transfer of data to the physical delivery of the letter to the door step of the resident. Any integration with existing databases would need to be carried out by the supplier. Periodic reports, as defined by UIDAI, need to be generated from this MIS.

PART-II: SERVICE LEVEL AGREEMENT

1. The purpose of this Service Level Agreement (SLA) is to clearly define the levels of service which shall be provided by the Supplier to the Purchaser for the duration of this Contract.
2. The benefits of this SLA are to:
 - (i) Trigger a process that applies the Purchaser and Supplier management attention to some aspect of performance when that aspect drops below an agreed upon threshold or target.
 - (ii) Makes explicit the expectations that Purchaser has for performance.
 - (iii) Helps Purchaser control the levels and performance of Supplier's services.
3. The Purchaser may initiate an interim review to check the performance and the obligations of the supplier and, in case desired, review and revise the SLA. The Purchaser reserves the right to revisit the SLAs at a later date based on the learning from past experience and stabilization of operations.
4. The Purchaser or its designated officials shall have the right to conduct quality and process audit of the Supplier, at any point of time, in respect of SLA or any other parameters at any time without prior notice.
5. The Supplier shall submit reports on all the SLA and key parameters defined in this Section to the Purchaser in accordance with the specified formats and reporting periods. The Purchaser may ask the Supplier to provide clarifications on these reports as well as the measurement tools and processes utilized by the Supplier for reporting. The Purchaser should have full access to check the status/report at any time. The Supplier shall extend full cooperation for conducting such audits.
6. All SLAs are defined with reference to the allocated quantity on a daily basis for selected supplier. The current tracking assumes a total daily quantity of 10 lakh letters per day distributed across three suppliers as per the volumes indicated in the Clause 2.3 of Part-IV of Section-II.
7. Each supplier is expected to have the ability to Ramp up to 25% more than the allocated capacity, within 6 weeks of intimation of the same.

A. SERVICE LEVEL AGREEMENT:

1. Measurement unit : Per article
2. Reporting unit : Per article
3. SLA review period : 1 Month
4. SLA calculation methodology : As defined in each case
5. Penalty imposition method : Slab based, as a % of Monthly Bill

B. KEY PERFORMANCE INDICATORS:

1. The Supplier shall be required to adherence to the following time-lines:

TABLE-1

Serial No.	Activities	Time frame <i>(for each stage/activity)</i>	Cumulative Time Frame (Target) <i>(from date and time of electronic data made available by UIDAI at designated locations)</i>
1.0	Electronic Data Transfer/Download	6 to 8 hours	8 hrs.
2.0	Printing of Articles.	48 hours. (Time for electronic transfer is included in activity 2)	48 hrs.
3.0	Bagging	Within 24 hours of printing data	72 hrs. (3 days)
4.0 (a)	Dispatch of bag to the designated <u>branch offices</u> and upload of individual letter information on Speednet.	168 hours for Jammu & Kashmir and North East region.	240 hrs. (3 + 7 = 10 days)
4.0 (b)		120 hours for the rest of India.	192 hrs. (3 + 5 = 8 days)

C. CALCULATION METHODOLOGY

1. Benchmark for Regions

For the purposes of defining benchmarks, the country is being treated as two distinct parts, namely the North East and J & K as one region henceforth refers to as **NE**, and the Rest of India as one region, henceforth referred to as **RI**. Accordingly, separate cumulative benchmarks have been defined for each region as under:

TABLE-2

Sr No	Region	Hours	Days
1	Benchmark for North East and J&K (NE)	240	10
2	Benchmark for Rest of India (RI)	192	8

Note: All calculations shall be in hours.

2. Categorization of Articles with reference to Benchmark

It is expected that the bulk of the Articles will be disposed within the cumulative benchmark time for the region. The Key Performance Indicators are expected indicative times that are to be achieved by the Supplier. However, where the cumulative benchmark is breached, the delay will be categorized as under for the purpose of penalties and exemptions:

TABLE-3

CATEGORY	DESCRIPTION	NE (Hours)		RI (Hours)	
		FROM	TO	FROM	TO
C0	ARTICLES DELIVERED WITHIN BENCHMARK	0	240	0	192
C1	ARTICLE RANGE DELAYED, MORE THAN BENCHMARK TO 25% OF BENCHMARK	240	300	192	240
C2	ARTICLE RANGE DELAYED, MORE THAN 25 % OF BENCHMARK TO 50% OF BENCHMARK	300	360	240	288
C3	ARTICLE RANGE DELAYED, MORE THAN 50% OF BENCHMARK TO 7 DAYS OF BENCHMARK	360	408	288	360
C4	ARTICLE RANGE DELAYED BY MORE THAN 7 DAYS OR 168 HOURS FROM BENCHMARK	408	-	360	-

3. Monthly reporting format

The start time for each Article is the placement of data for download, in the designated location, by the Purchaser. The end time for the Article is the date time stamp of the article, on the Speednet server, as proof of upload of dispatch information of the Article. The Supplier is expected to utilize the MIS created, for generating reports to meet the information requirement indicated in the various tables:

TABLE-4

CATEGORY	C0	C1	C2	C3	C4	TOTAL
NORTH EAST AND J&K (NE)	NE0	NE1	NE2	NE3	NE4	A1
REST OF INDIA (RI)	RI0	RI1	RI2	RI3	RI4	A2

Note: The number of articles, in each category, for the month, are to be provided above.

4. Summarized monthly report on variations

For each month, the average delivery time of all Articles for that month shall be considered for a specific region. In all cases where the Supplier is functioning at a level better than the benchmark, it shall serve to offset the cases where the Supplier may exceed the stated benchmark. Hence, overall good performance, namely, bettering the benchmark, is incentivized to enable offsetting few stray cases that may exceed benchmark:

TABLE-5

SR NO	REGION	TOTAL ARTICLES (NUMBERS)	AVERAGE TIME (HOURS)	VAR (% VARIATION FROM BENCHMARK)
1	NORTH EAST AND J&K	A1	T1	$(T1 - 240) / 240$
2	REST OF INDIA	A2	T2	$(T2 - 192) / 192$

5. Penalty for variation from benchmark

Penalty will be imposed on a per Article basis. Only those Articles that have failed to meet the benchmark shall be penalized. The penalty slab is also graded. For a lower overall variation from benchmark, the penalty imposed per Article, for the same slab, may be exempted leading to lower overall penalties. The penalty table based on percentage variation from benchmark is indicated below:

TABLE-6

PENALTY TABLE BASED ON % VARIATION FROM BENCHMARK					
CATEGORY	PENALTY SLAB	VAR (% VARIATION FROM BENCHMARK)			
		LESS THAN 10%	10% TO 20%	20% TO 30%	MORE THAN 30%
C0	S0	0	0	0	0
C1	S1	0	0	0	5
C2	S2	0	0	15	15
C3	S3	0	25	25	25
C4	S4	0	35	35	35

6. Calculation of payment to the Supplier

Payments due will be calculated separately for the North East and J&K (**NE**) and Rest of India (**RI**). This is because both regions have a different stated benchmark and it is possible for the percentage variation from benchmark to be different for both regions. Therefore, the penalty slab, if applicable would also be different. The table for calculation of payment due is indicated below:

- (a) Re-print the entire batch, the cost of which shall be borne by the Supplier.
- (b) Delivery cost of all the articles in the batch shall be borne by the Supplier.

APPENDIX C**REPORTING REQUIREMENTS**

(The reports and documents will be submitted to purchaser in the manner, frequency, time period as under)

A. REPORT REQUIREMENT:-

The Service Provider is required to provide a web based portal for viewing the Stage-wise progress of printing, matching, enveloping, BO-wise bagging and speed net upload of the UIDAI articles. Suitable periodic reports would need to be available at the portal and customized report generation on parameters, like Date Range, Region, Enrolment Agency, Activity stage and other parameters should be possible online.

Salient features of the MIS based reporting system are listed below:-

1. The portal would need to be web based
2. Certain information would be public facing and open for all.
3. Password and Username based access is need to be enabled for the officials of the UIDAI, Registrars, Enrolment Agencies and any other parties, authorized by the UIDAI.
4. All tracking of the individual articles would be based on the Enrolment ID (EID) (in 14 digits), and the date (in 8 digits) and time (in 6 digits) stamp at the time of enrolment. A combination of these three elements is called the EID number in 28 digits, and this would be a basis of identification of individual records / articles.
5. It is expected that the Department of Posts would provide a 13 digit tracking ID and Barcode. Each article would have a unique 13 digit letter tracking ID called the UA or UB or similar barcode. This is the tracking number through which the individual article can be tracked at the speed net server of the Department of Posts.

6. Integration would be required with the speed net server to fetch the latest tracking information for a given article. In addition, the tracking files relevant to the given article would need to be regularly uploaded into the main database of the Service Provider, so that the information regarding letter delivery is always available. It is expected that the Service Provider will update this database at least 3 times in a day.
7. The Card and Welcome letter Printing Process have many stages, starting from placement of electronic data, by UIDAI, in a designated location, to the actual upload of dispatch of article on the DoP speed net server. The indicative events that are to be captured in the MIS, with a date time stamp include :
 - a. Placement of electronic data in designated location
 - b. Downloading of electronic data from designated location.
 - c. Generation of the print files.
 - d. Allocation of specific articles to a particular print batch with identifying print batch number
 - e. Actual printing of letter
 - f. Matching of letter and card
 - g. Enveloping of the article
 - h. A BO-wise bagging of article and tagging the manifest list number to a specific article.
 - i. Upload article dispatch information on the speed net.
 - j. Capture the location of booking.

All the above date time stamps need to be captured automatically from the production machines deployed to generate the articles. The cumulative numbers for each activity stage and the date time stamps, would form the basis for the reports.

B. REPORTS REQUIRED:-

1. Individual tracking of article:

Input:- Enrolment ID

Output:-

- a) The print file name in which electronic data was given to the Service Provider.

- b) The letter tracking number (UA number) allocated to the article.
- c) All the events mentioned at the point (7) above along with the date-time stamps.
- d) Letter delivery information obtained from the speed net server.

2. Aggregated information:- The information available in the MIS is to be retained for all articles printed by the Service Provider. The indicative parameters on which the database should be searchable for report generation have been listed below.

- a. A Date Range (From__ to __)
- b. A particular event / activity (letter printing, letter dispatch)
- c. A particular geography (Sub-district, district, state)
- d. On Letter Delivery Status
 - (i) Delivered
 - (ii) In transit / undelivered
 - (iii) Returned

3. Articles specific to Registrar, articles specific to Enrolment Agency:

The parameters/filters may be applied as one, or in a combination of many.

In the normal course, the parameters mentioned above are either

- (i) part of the address data sent for letter printing; or
- (ii) of the event captures at the premises of the Service Provider; or
- (iii) of the speed net database pertaining to letter deliveries.

Should any additional information be required, the same would be provided in electronic format by the UIDAI, duly tagged to the enrolment ID, for integration into the MIS tables.

C. STANDARD REPORTS:

1. Event-wise cumulative numbers of articles across given events (as indicted in point 7) for a given date range. The event could be electronic data received, print file generated, article bagged, article uploaded on speed net and such like.
2. State-wise breakup of letters dispatched, under the heads Delivered letters, Undelivered letter, and Returned letters. The ability to drill down the pin code and branch offices is to be built into this report.

3. Reports pertaining to defined SLAs and given performance parameters that may be identified are to be generated.

The information provided above is to give an indication of expectation from the website based MIS reporting system.

D. BOOKING FILE:-

For each article, mapped to an EID number, a unique article tracking number (UA or UB number in 13 digits) will be allocated, An electronic file, uniquely mapping each EID to each tracking number will need to be generated. This file called the Booking File, is to be shared on a Daily Basis with the UIDAI and the DoP, through a secure leased line connectivity.

The technical teams of all parties would need to firm up the data structure and data formats of the file.
